KITCHEN SINKS & FAUCETS

Introduction

Dear Customers,

Häfele has now pioneered the way fittings are sold in India since 2013. Being a German company our foremost concern has always been to offer our customers, premium quality products at approachable prices paired with solution based services. Our core competency in kitchen fittings has been a trigger point for us to engineer a range of products for the washing area of the kitchen. Through this catalogue, we present to you a complete and elegant range of kitchen sinks and faucets, backed by advanced technologies and rendered in latest designs, materials and colours. This range of kitchen products comes with the highest standards of quality backed by numerous testing and certifications. What's more is that what we bring to you from across the globe in the form of technology and design has been carefully researched and engineered to ably suit Indian kitchen environments.

Hafele presents to you the patented Silgranit sinks from BLANCO, Germany that come in a range of elegant colours, ergonomic shapes and a multitude of sizes to choose from. Our range of SILGRANIT PURADUR II kitchen sinks is backed by 60 years of experience and research in market knowledge, engineering proficiency and latest technologies, just so we can adapt it to your likeness and needs. The SILGRANIT material is a unique and patented technological break-through that combines the hardest elements found in natural granite, acrylic, ceramic and colour pigments to give you the result of a kitchen sink surface you may have never seen before.

Along with this range, comes the sheer elegance in designing competency through our range of BLANCO faucets available in chrome plated finish as well as colours that match the look and texture of our SILGRANIT sinks. In terms of quality and technology, these faucets are extensively tested and certified to provide maximum safety in health and hygiene and provide longevity in use thanks to the long-life ceramic disc cartridges which provide for a precise adjustment of the water amount and temperature.

Through this range, we also introduce to you Italian design and fashion in the form of faucets from Armando Vicario. Backed by more than 40 years of investigation and experience, this range is a synonym of quality and safety for you, our customer.

These faucets are engineered with an Anti-Lime pure water outlet design where the aerator reduces the possibility of lime formation & increases the lifespan of your faucet. The in-built Water Sense Technology saves 20% more water than similar products in the market. Available in classic Italian designs or modern contemporary lines, you can't miss your favourite pick from this range.

Finally, our in-house range of stainless steel sinks presents itself with inherent properties and features that are most suitable for Indian kitchens where washing and cleaning is an aggressive activity and the use of water is much more than any of our global counter parts. The ARGENTO series is an elegant range of hand-crafted sinks that comes in different designs and sizes to choose from. Our range of punch-bowl sinks under the SPLASH series is carefully engineered to withstand extreme conditions of use. Taking into account the constant exposure of a sink to dampness and moisture, our Stainless steel sinks are coated with Asphalt at the base of the bowl protecting them from condensation or corrosion. A special sound suppression pad of 0.5 to 0.8mm thickness is integrated into the sink bowl which enables these Sinks to absorb excessive noise when vessels are being washed.

So come and experience the elegance of designs and the convenience of functionality with our range of luxury kitchen products. Give your family a chance to live a fresh and healthy lifestyle; give yourself a chance to live very Häfele!

Enjoy.

Jürgen Wolf.
Managing Director
Häfele India Pvt. Ltd.

Hafele

Reassuring Expertise

"For over 9 decades, we've been helping people make more of their homes.

Established in Germany, and now operating worldwide, we specialise in the fittings, hardware and systems that improve the way your home, works. So when you choose our products as part of your new or reformed home, you know you're getting the benefit of extensive knowledge and decades of experience.

And we're still a family business, owned and managed by family members who really care about the products

and service we provide. You can rely on our commitment to the highest standards of quality and reliability, founded on a long tradition of German engineering where attention to detail is second nature.

All our home improvement ideas are built to last – day in, day out – we want you to get the very best from every corner of your home, for many years to come."

Hafele

Worldwide

With its origin in 1923 in a small town named 'Nagold' from the Swabian region of Germany that nurses a passion for hardware technology, it is no surprise that Hafele has lived up to its roots through a successful presence in the architectural and furniture hardware industry for over 93 years now. Today, Hafele's worldwide penetration includes 38 subsidiaries across Europe, America, Asia, Australia and New Zealand. In addition to this it has 9 sales offices in other countries. The Hafele headquarters, 5 manufacturing units and 10 sales offices are located within Germany. The company also owns one of the largest and most sophisticated warehouses in its home country. The Hafele worldwide workforce is empowered by a base of over 6800 employees.

The group services over 150,000 customers across the globe through its extensive range of hardware products and a comprehensive logistics system. In addition to this, Hafele also provides consultative services to its customers, educating and advising them about buying the correct hardware as per their requirements. With this level of market penetration and ability to handle worldwide demand, it comes as no surprise that the company is an authority in the segment of home interior solutions; what is pleasantly surprising, though, is that in spite of its size, Hafele still remains a family owned and run business with a unique, friendly and value-centric work culture which is strongly followed among all its subsidiaries.

Hafele India

Hafele India, a subsidiary of the Hafele Global network since 2003, lays pride in its diverse range of quality products, well-networked channel partners and unmatched service to customers. The ability of the company to understand the diverse Indian market and adapt to the changing tastes and trends, has made it an authority in the field of architectural hardware, furniture fittings and kitchen fittings and accessories. The company also has a strong presence in related industries through its independent product verticals namely Appliances, Lights and Sanitary catering to the focused demand from these industries. We service our customer demand with a base of over 600 employees present in all regions of the country and through a comprehensive Logistics Centre located 40 kilometers from our Head Office in Mumbai along with independent regional distribution centres in Bangalore, New Delhi and Kolkata respectively. This service is complete with our equipped

Customer Care division that handles and resolves all customer queries and issues with speed and efficiency. Our staff has more than tripled in the last few years and we will continue to add more talent to our team to provide better and more services to our customers across the country.

The company has four flagship showrooms in Bangalore, Delhi, Mumbai and Kolkata respectively, apart from the well-networked franchise and dealer base that it already has in different parts of the country. With this successful backing and the promise to grow in manifolds, the company is on an expansion mode to meet the ever-growing demands not only from India but also its neighbouring countries. Owing to this, Häfele India has spread its operations to countries like Nepal, Bangladesh, Bhutan and has a Branch Office, Design Showrooms and Distribution Centre in Sri Lanka.

ENDULGE IN THE PURITY OF DESIGN AND TEXTURE

Kitchen sinks that define unbeatable standards of design, functionality and maintenance.

Our range of **SILGRANIT™ PuraDur™** kitchen sinks from BLANCO, Germany is backed by 60 years of experience and research in market knowledge, engineering proficiency and latest technologies, just so we can adapt it to your likeness and needs. The SILGRANIT material is a unique and patented technological break-through that combines the hardest elements found in natural granite, acrylic, ceramic and colour pigments to give you the result of a kitchen sink surface you may have never seen before.

Advantages of SILGRANIT™ PuraDur™ sink

- Outstanding easy-to-care feature
- Non-porous sealed surface that's easy to clean
- Superior durability
- Patented hygiene protection formula
- Optimum space utilization for more comfort
- Resistant to scratches and harsh conditions
- Material and colour choices that enhance interiors

Today, BLANCO has produced more than 40 million sinks, and is recognized as a world leader in quality, innovation and unsurpassed service. Long gone are the times when a sink was merely used for function. These days, it can be the muse for a kitchen – or perhaps an entire home. Because of BLANCO's dedication to quality, every sink is inspected multiple times before earning the BLANCO name, it's just a part of their commitment to craft. BLANCO commits itself to respect ethical business principles and since 1994 has been a member of the Caux Round Table (CRT), an international network of principled business leaders and companies working to promote a moral capitalism

BLANCO turns a sink into a sink centre. Tips for making the right choice

Optimum space utilisation for more comfort

BLANCO offers solutions for any size of sink cabinet. A cabinet width of 60 cm is ideal for sinks with a main and additional bowl

Ergonomics and functionality

The main and additional bowls and accessories are designed to match each other perfectly. Comfort solutions – such as the AXial concept – help to achieve efficient working.

Cleaning made easy

The surfaces of sinks and mixer taps are wonderfully easy to clean. Special materials help to repel dirt and water.

Mixer taps by BLANCO

BLANCO offers a wide selection of designs of high functionality. Certified in accordance with the strict quality criteria of independent test institutes, they meet the highest requirements for safety and hygiene.

Material and colour add highlights

The right combination of sink and mixer tap creates an ambience that matches any home living style.

BLANCO EasyCare – Care is more than a superficial matter

Easy care of Maintainance

The material contains water and dirt repellent agent. Permanently easy to care for

BLANCO CARE

Care products from BLANCO are specially designed to suit the respective materials. All conceivable problems can be dealt with. From scratches to limescale deposits and fingerprints to rust, metal abrasion and discolouration.

BLANCO WARRANTY

offers 10 years warranty on manufacturing defect or faulty workmanship on BLANCO products

Simply quicker to clean

An independent survey proves it: **the heart of every kitchen is the sink. Over 60% of the work is done here, despite dishwashers!** This creates a great deal of dirt, of course. And this must be cleaned away. But this costs time.

This is a great deal to expect but, at BLANCO, it is precisely this which is the driving force behind our developments. **We want to make kitchen chores as simple and as easy as possible.**

BLANCO EasyCare is the name behind this concept, a superior product concept:

Sinks, which are simply easier to clean!

BLANCO sinks are the right choice for:

- the degree of work facilitation
- the long term value of the kitchen
- the pleasure from and in the kitchen

reddot design award winner 2013

SILGRANIT™ PuraDur™

Easy to maintain and long-lasting

Thanks to the excellent material properties, SILGRANIT™ PuraDur™ offers an ease of care and **level of resistance that has never been offered before** for coloured composite sinks.

Unsurpassed scratch resistance

Unsurpassed resistance to breakage

Unsurpassed heat-resistance to 280°C

SILGRANIT™ PuraDur™ is identified by its:

- 100% suitable for food use
- 100% acid resistant
- 100% non fading

Unique colour fidelity

There is a choice of **six delightful colours with the identical surface condition** in all, and all specially designed to match the BLANCO taps.

Unsurpassed ease of cleaning.

Material properties

The stony-silky surface and very finely pored, closed surface create a soft stone-like character that is soft to touch.

New and hygienic: the concealed C-overflow™ enhances the elegant look.

Perfect interplay: the newly designed accessories for optimum steam preparations at the sink.

PLEON 9: young straight-lined design. The additional bowl provides a high degree of comfort.

PLEON 8: Particularly spacious bowls provide an unsurpassed amount of room.

BLANCO ALAROS 6 S - SILGRANIT™ PuraDur™

Inspired by modern architecture

product design award
2008

- Spacious sink with symmetrical design
- Drainers extend wing-like on both sides of the centre bowl
- XL-single bowl with high-quality C-overflow™
- Lower tap ledge for retractable tap
- Two glass cutting boards in black or white slide over the complete length – and can also completely cover the bowl
- Flat, all-round rim acts as guide for the cutting boards
- Intermediate level in bowl, ideal when using BLANCO ALAROS structure grid
- Pre-drilled holes for knock-out at site

BLANCOLINUS-S

FAUCETS THAT REDEFINE ERGONOMICS

Sleek, clean lines or sinuous shapes, we have the competence in faucets to match the elegance of your sink centre.

Equip your sink centre with a faucet which matches the design of your kitchen. BLANCO faucets incorporate a high quality mechanism, are equipped with a wide variety of additional functions and make all your chores much easier – from washing salad to cleaning pans. Make the most of the high degree of creative freedom they offer and combine the materials and colours of the SILGRANIT™-look or ceramic-look taps with the matching sinks.

FEATURES:

- Our faucets are extensively tested and certified, they thus provide maximum safety in terms of health and hygiene
- Created with certified quality materials; all water conducting parts of the faucet have been tested
- Our faucets provide longevity in use thanks to the long-life ceramic disc cartridges which provide for a precise adjustment of the water amount and temperature

Put your trust in **BLANCO** mixer taps.
Quality for the sake of your health.

Avoid risks to your health.

Untested taps can significantly exceed the maximum permissible value for substances which endanger health. BLANCO taps are extensively tested and certified. They thus provide maximum safety in terms of health and hygiene.

Clean water is our contribution to your health.

BLANCO proves its high sense of responsibility towards people and the environment in many ways, not only by exclusively using certified quality materials in all water-conducting parts of BLANCO taps, but also by continuously monitoring them by means of voluntary tests.

The advantages for you:

- a good feeling every day about the hygiene and health protection for the whole family
- confirmed safety when buying taps
- durable products with high quality

BLANCO taps: seal of approval for safety and hygiene.

Blanco has the technology and hygiene of its taps voluntarily tested according to the stipulations of the German drinking water regulation and certified by the DVGW Cert GmbH (Certification body of the German Scientific and Technical Association for Gas and Water e.V.).

With this certification BLANCO taps provide one of the highest qualities currently available in the Indian market.

The voluntary certification by the DVGW is BLANCO's documentary proof that requirements for the protection of drinking water are being observed.

Before the certification takes place, the technology and hygiene of a range of taps are subjected to a large number of individual tests by various, independent institutes.

The following criteria are an essential part of these tests:

- safeness of the materials used (all materials coming into contact with water are tested for hygienic properties and constituents which can present a health hazard.)
- durability in hot-cold permanent use
- flow rate
- intensity of water noise

The patented Neoperl cascade reduces limescale and provides an even flow of water.

The integrated check valve keeps used water away when the spray is in use.

Elastic silicone nubs keep the spray free of limescale, and are easily cleaned just by rubbing with a finger.

Because they are so long, the flexible connection hoses are ideal even for difficult conditions.

Long-life ceramic disc cartridges provide for a precise adjustment of water amount and temperature.

BLANCO ELOSCOPE-F II

The retractable tap in a clean design

- Clean, uncompromising design for pioneering kitchens
- Higher arc spout for easier filling of pans and vases
- The best possible functional coordination with BLANCOALAROS 6S sinks
- Unique: When combined with BLANCOALAROS 6S sinks, the BLANCOELOSCOPE F II can be retracted to below the worktop
- Water flow rate of spirit 11.5L/minute at 3 bar dynamic water pressure

Installation examples - undermount, flush-mount and flush undermounted installation

Undermounted

All BLANCO inset sinks can also be installed from below in non-hygroscopic worktops made of natural stone or composite.

The sink is tightened against the worktop below the cut-out by means of special retaining brackets. This requires the mounting of a special dowel on the underside of the worktop.

The rim of the sink and the lower edge of the worktop are sealed with sealant.

Please note:

The control elements' accessibility and the ease of cleaning can be affected by undermount installation.

Flush mounted

The flush mounting procedure involves inserting the sink from above. Only special models with a specially designed rim are suitable for this.

For laminated worktops, the sink is drawn into a supporting profile which is either screwed, bonded or integrally cast into the worktops cut-out.

Where the worktops are made of granite or composite, the sink is drawn onto a recess milled into the work surface.

In both cases, the sink lies in an all-round bed of sealant to ensure durable, secure bonding of sink and surface and prevent moisture seeping in.

Flush undermounted

The procedure for flush undermounting involves inserting the sink from below. All BLANCO sinks are suitable for this.

For laminated worktops, the substrate around the cut-out is completely removed by milling from below down to the top layer of the worktop. The rim of the sink is bonded against the laminate layer and the sink is permanently bonded with the worktop from below by filling with a cast resin.

Armando Vicario is known for its professionalism, experience and constant engagement to produce high quality Kitchen Mixers all over the European market. It carries an articulated product range, starting from modern single lever mixers in a young and functional design to the most classic fashion line. Armando Vicario taps are made in Italy and are the result of long-term investigation and experience, quality and safety for the customer.

ITALIAN FASHION REFORMS YOUR KITCHEN

Kitchen Mixers from Italy that spell class and elegance with uncompromising functionality.

We bring to you our exclusive range of kitchen faucets from Armando Vicario, Italy. Backed by more than 40 years of investigation and experience, this range is a synonym of quality and safety for you, our customer. Available in classic Italian designs or modern contemporary lines, you can't miss your favourite pick from this range.

Features:

Long Operational Life:

Armando Vicario taps are completely manufactured in Italy and are the result of long-term investigation and experience, synonym with quality and safety for the customer. With this body of experience and the 10 years warranty provided by Häfele, these faucets guarantee a long operational life.

Perfect Water Flow:

Häfele's Armando Vicario Kitchen Faucets have a flawless stream quality even under difficult flow conditions

Quiet Operation: These Kitchen Faucets have a very low operational noise level thus accounting for maximum ease and comfort to the customer

Vandal Resistant Aerator:
The Armando Vicario Kitchen Faucets have vandal resistant aerators which cannot be removed without using a special key, supplied with the product

Water Sense Technology:
These faucets are integrated with a Water Sense Technology which helps saves 20% more water than similar products in the market

Smart Lime Cleaning:
The Armando Vicario Kitchen Faucets by Häfele have an Anti-Lime pure water outlet design for their aerator which reduces the possibility of lime formation & increases the maximum lifespan of the faucet aerator

Technology

Think today about the future

think
.....
green

How to save water?

Consumptions can be reduced and it's easier than what you think

> Avoid wasting.

For example, use full load washing machine and dishwasher, water the plants at evening when temperature is lower, do not leave taps open unless necessary (letting the water run as you brush your teeth)...

> Use low water consumption systems.

Flow reducers, thermostatic taps, aerated taps and low consumption appliances together with a water use attentive and rational, guarantee remarkable **drinking water saving up to 20-30%**.

ARGENTO

The ever increasing popularity of handmade sinks is directly connected to the possibility of welding a perfectly customized sink as per the individual requirement and design preference of the customer. Hafele's range of handmade sinks from the ARGENTO series are made of high grade Stainless Steel (SS 304) and coated with an elegant satin finish – providing a durable and aesthetically stylish solution for your cleaning needs in the kitchen. Our range of ARGENTO sinks are tested to resist any external damages like chipping, cracking or peeling and the Satin coating provides additional protection from scratching and rusting. The hygienic and aseptic properties of stainless steel make the maintenance and cleaning of ARGENTO sinks virtually effortless!

Taking into account the constant exposure of a sink to dampness and moisture, our ARGENTO sinks are coated with Asphalt at the base of the bowl protecting them from condensation or corrosion. A special sound suppression pad of 0.5 to 0.8mm thickness is integrated into the sink bowl which enables the ARGENTO Sinks to absorb excessive noise when vessels are being washed. All our ARGENTO sinks carry a warranty for 2 years against faulty workmanship and material. The ARGENTO sinks' drain Pipe is specially designed to enable smooth discharge of soiled water into the drain lowering the chances of clogging. The ARGENTO sinks are available in standard bowl depths of 8, 9 and 10 inches making it easier to wash even the heavy and large vessels in your kitchen.

Advantages / Feature

Finish: All ARGENTO sinks come with a uniform European Satin Finish that aesthetically enhances the elegant design of the sink bowl.

Steel Thickness: All ARGENTO sinks are made of Stainless Steel grade 304 with a thickness of 1.2 mm. Grade 304 contains 18% Chrome and 8% Nickel which increases the resistance of the material to corrosion and rusting; providing extraordinary durability and unbeatable performance.

Coating: To avoid sound, the undercoat is extremely important for any Stainless Steel sink. All ARGENTO sinks are coated to about 0.5 – 0.8 mm thickness with Asphalt - a material which absorbs sound and protects the base of the sink from condensation and corrosion.

Sound Deadening Pad: In addition to the Asphalt coating, a special sound suppression pad of 2mm thickness is integrated into the ARGENTO sinks to absorb excessive noise of the Utensils during use.

Advantages / Feature

Drain Pipe: The ARGENTO series come with a Drain Pipe which is specially designed to prevent clogging and ensure easy cleaning.

Easy to Clean: The inherent aseptic property of stainless steel makes the maintenance of ARGENTO sinks virtually effortless. They are hygienic and easy to clean.

10 Year Warranty: All ARGENTO sinks are guaranteed for 10 years against faulty workmanship and material.

Extra Deep Bowl: ARGENTO sinks come with extra deep bowls ranging from 8 to 10 inches making it sufficiently easy to accommodate large and heavy-duty vessels for cleaning.

TESSA S - Single Bowl Sink

Hafele's SPLASH punching bowl sinks are carefully engineered through a unique drawing process where pressure is individually controlled in combination with a lubrication process which draws out the sink bowls out of a Grade 304 Stainless Steel sheet, without the steel itself breaking. The stainless steel sinks are then coated with an elegant satin finish to add a layer of protection against scratching or rusting. The well rounded shape of our SPLASH sinks makes way for easy cleaning, eliminating the chances of any unwanted residues in the remote corners of the sink bowl.

Our range of SPLASH sinks are tested to resist any external damages like chipping, cracking or peeling and the hygienic and aseptic properties of stainless steel make the maintenance of these sinks virtually effortless! The grade 304 composition of stainless steel with 18% chromium & 8% Nickel further enhances the durability of our sinks, making them highly tolerant to humid conditions. SPLASH sinks come with a special stone guard undercoating and rubber padding to absorb excessive noise levels of utensils during use. They come with a Drain Pipe of size 3.5 inches, specially designed to prevent clogging and ensure easy cleaning. SPLASH sinks come with a sink bowl depth ranging from 8 to 10 inches, making the washing of heavy-duty vessels an effortless task. All sinks from the SPLASH series come with a 2 year warranty against faulty workmanship and material.

Advantages:

Stainless Steel: Hafele SPLASH sinks use 0.8mm premium grade SUS304 stainless steel consisting of 18% chrome and 8% nickel, making the sinks highly durable and resistant to corrosion

Finish: All SPLASH sinks come with an elegant, scratch-resistant premium satin finish

Padding: The sinks are padded and Stone-Guard undercoated which reduces noise levels while the sink is in use

Bowl Depth: 8 and 10 inches bowl depths that can easily accommodate heavy vessels during any cleaning cycle

Unique Overflow System: The unique overflow system prevents water from spilling over and the reversible design can easily render a left hand or right hand installation.

Drain System: The 3.5 inch drain outlet is compatible with most garbage disposals available in the market; it comes with a stainless steel strainer and a plastic drainage pipe

Packaging: SPLASH sinks come in a handy packaging equipped with mounting & installation brackets as well as cut-out templates

Warranty: Hafele offers a 2-years warranty for the SPLASH range against faulty workmanship & manufacturing defect from the date of invoice

Finish: Chrome

We should Avoid

- The use of plastic bowls for washing, as they can cause heavy localized scratching;
- Leaving salt, vinegar, citric fruit juices, mustard or pickles on the surface for any length of time as they can cause corrosion
- Abrasive cleaners such as bleach, scourers or wire wool pads

Maintenance Tips

- Frequent and regular cleaning – keep the sink clean and dry when not in use
- Expose your sink to normal room temperature when not in use
- Keep the sink free from any standing water at all possible times
- Avoid the accumulation of water high in iron content as it can leave brown stains on the sink surface
- Remove the Lacquer sheet only after installation

Things that can harm your sinks

- Do not allow any mineral deposits
- Do not use steel wool or abrasive pads to clean your sink
- Do not leave rubber dish mats, wet sponges or cleaning pads in the sink overnight
- Do not use the sink as a cutting surface or cutting board
- Do not let ordinary or white cement to deposit on the sink after installation
- Do not use household products, cleaning products, bleach or Foodstuff which contains chlorine, sulphuric /hydrochloric acid as they are potentially harmful to your sink
- Pickles, mayonnaise, mustard and salt laden foodstuff should not be left on /in the sink for a long period.
